≡ **Description**   Edit

This test plan is for testing Unit 6 Assessment.

Test Case:

1. Verify that the game can be started successfully

- Open the game
- click the "Start Game" button
- verify that the game board appears all 10 available bots when you click "See all Bots"
- verify that when you start game it shows 5 random bots.
   1. Verify that the game only lets you select 2 bots to play with.
- Open the game
- Click "Start Game"
- Select two bots to start to make sure it moves those to the selected section.
- After try selecting a 3rd and make sure it throws an error of: 'You can only choose two bots!'

Bug Report:

Title: Game does not count wins

Severity: High

Steps to reproduce:

- Open up the game at: '**http://localhost:4000**'
- Click "Start Game" and select the two bots you want.
- Play a couple times so you have at least 1 win and 1 loss.

Expected result:

- The game board should show both wins and losses at the top.

Actual Result:

- The game shows that you lost every game with no wins even though you did win.
